

"III INTERNATIONAL WORKSHOP INFLAMMATION AND IMMUNITY: FROM BENCH TO CLINIC"

Seville, Spain
26 November 2020

This scientific seminar aims to meet basic and clinical researchers, together with industry and administration representatives, to explore and discuss inflammation and immunity in health and in pathological processes. Our aim is to promote a debate on research in these fields and to stimulate the translation of research findings into novel therapeutic applications. It will be an opportunity to forge new scientific collaborations within our environment and to favour the bases for future activities and joint projects.
