Language: Spanish

Arribes del Duero's Natural Park landscape in a sector of the province of Zamora is analysed and the landscape units are mapped. The interpretation of the landscape is carried out in an integrated perspective. On the one hand, the organization of the landscape is studied, namely, the structure of their physical, biotic and anthropogenic components. Furthermore, the evolution of the landscape is also take into account by interpreting the survivals and changes. After the landscape units with a singular and unique character are mapped at a scale of 1/25.000. Finally, we proceed to the classification, characterization and mapping of a representative nomenclature for each unit.

Key words: Landscape units; mapping; Natural Park; Arribes del Duero; Zamora.
